

SWINE FLU!

Can Philly handle a really, really, really,
really, really, really, really, really, really,
really, really, really, really, really, really,
really, aggressive strain of the swine flu?

ZOMBIE CLASSIFICATION

*Based on intelligence gathered under the pretense that zombism is real, and George Romero is merely a prophet foretelling the future

+ PARANORMAL

The Infected have become possessed by an other worldly force or energy. The resulting entity has an intense thirst for killing, not for dietary reasons, but what one would assume as stemming from a murderous, desire for evil.

Army of Darkness
Evil Dead 1 & 2**
Dead Snow
Pet Cemetary
Dead Space
Passion of the Christ†

**should be cited as basically the same source, but with a higher budget
† slight exception to that whole "evil" thing

+ VIRAL

The Infected have become ill due to the affects of an outside contaminent. This disease only infects the currently living. It can be airborne, waterborne, and/or bloodborne. Transferred by rabid monkeys, crows, or power crazed pharmaceutical companies looking to control the government and/or prophetic ego. Infection is 100% contagious, and 100% lethal.

+ CHEMICAL

The Infected are the result of exposure to radioactive or toxic material. This is usually due to human error in properly disposing of said "waste" and/or lab accident. The Infected mutants generally feed as a primal instinct, and move in packs to the location of the food.

SOURCES
C.H.U.D. 1 & 2
House of the Dead
Planet Terror

+ VOODOO

The Infected are generally possessed by a Voodoo Shamen. Essentially they submit all mental and physical ability to their masters who in turn use their new minions for self gain. They have been known to enjoy music.

SOURCES
Weekend at Bernie's 2

+ PARASITE

The Infected are know to be under control of a parasitic organism. These parasites generally feed on the neurotoxins generated by the brain, therefore they resume control of the human host once attached. Removal of the organism is 100% lethal to the host.

SOURCES
Night of the Creeps
Slither

+ NATURAL EVOLUTION

The infected have no real source of origin. Therefore one can assume that nature has evolved the body from human decay to the next step in the ladder. Their reanimated corpses now becoming a carrier for a pathogen used to advance other human bodies to this next evolutionary step. Erego humans "die" from a bite, but reanimate naturally.

Z-DAY: A TEST IN SOCIAL CONTROL & READINESS

ZOMBIE EVASION, DEFENSE & WARFARE CITY OF PHILADELPHIA

With the imminent threat of an apocalyptic outbreak always on the horizon, a plan for urban survival tactics and methods is being developed alongside an emergency response system. To test this system, we are taking it to the one city we wouldn't mind saving. So on November 3rd, the City of Philadelphia will be initiating "Protocol Z-Alpha 1." in city sector P-725. This initiative will be to test the readiness of the city and its citizens in the event of a horde onslaught. Once the system is perfected, we will consider moving it into other urban environments. Except Boston. Research shows we can actually do without Boston. If you would like to participate, please enter your phone number below. **Return to this site on Nov. 1 for more details.**

Citizen Participation

The information you submit will solely be used for the purposes of this test. It will not be resold, distributed or used in any other manner. While zombies are a great threat to the future of humanity, we believe spam & junk mail will lead to the end of civilization as we know it.
